Gryyp puncture repair kit

Price £30

Tested by Khal Harris, staff writer

You get goo for finding the hole, chalk to mark it, pliers to remove sharp, pointy stuff, half a dozen self-sealing plugs, four canisters of CO₂ to re-inflate a tyre to a useable pressure (around 25psi from dead flat) and four valve caps. I've used it twice on unlucky/lucky friends who've had punctures. Now it stays in my rucksack 24/7. Fantastic bit of kit.
