

USED BIKE GUIDE

Cargol Turn and Go

This ingenious set of tools is aimed at the tourer who may get stranded in the middle of nowhere with a puncture. Gone are the days of taking the inner tube out and filling the tyre with grass; modern day rubber, once holed, can be a real nightmare

to sort out, especially if you're a few miles away from the nearest help. The Cargol Turn and Go set is a complete puncture remedy enabling the stranded biker to get back on the move, albeit at greatly reduced speeds, until the next bike shop appears on the

414902

horizon. It is simple to use and effective too.
